

NUCHKAMOL NUTAMAN

Senior Software Developer | .NET | PHP | Node.js | Remote

(+66) 67 989 6641 | nuchkamol@gmail.com

Portfolio Website: <https://nuchkamol.github.io>

LinkedIn Profile: [linkedin.com/in/nuchkamol-nutaman](https://www.linkedin.com/in/nuchkamol-nutaman)

23, Itsaraphap Road,
Somdet Chao Phraya, Khlong San,
Bangkok, Thailand, 10600

Professional Summary

Software Developer with over 10 years of experience delivering end-to-end solutions, from requirement analysis and system design to development, integration testing, and deployment.

Proven experience working in large enterprises with structured deployment processes, as well as smaller organizations requiring hands-on ownership of deployment and system maintenance. Highly skilled in C# (.NET Core, .NET Framework), PHP, and Node.js, and continuously motivated to learn new technologies to support scalable systems and business growth.

Education

2018 – 2019	King Mongkut's University of Technology North Bangkok, Master's Degree in Management Information Systems (MIS)
2008 – 2011	King Mongkut's University of Technology North Bangkok, Bachelor's degree in Computer Science and Information (CS)
2002 – 2007	Suksanari School Bangkok, Thailand Major Science – Mathematics

Experiences

June 2024 - Present

Application Developer Specialist

BEC world public company limited (CH3)

- Developed and maintained multiple enterprise web applications, including a Web-based Carpark Management System using PHP.
- Designed and developed internal order management systems (CG Order and News Order Systems) using C# .NET Framework.
- Developed APIs for the 2024 U.S. Presidential Election by integrating data from AP News, enabling real-time data delivery to the Graphic Visualization Engine using C# .NET Framework.
- Developed API integrations with ServiceDesk Plus using Google Apps Script to automate data synchronization and reporting.
- Analyzed requirements and developed a Public Relations Content Management System (PR CMS) using C# .NET Core 8.0.
- Developed API services for APMS scheduling to support web-based APMS systems and the 3Plus mobile application using C# .NET Core 8.0.
- Currently developing a real-time API client for the 2026 Thai General Election Visualization Engine using C# .NET (WinForms).

October 2021 – June 2024

IT specialist

Advanced Info Service Public Company Limited (AIS)

- Led and managed system migration projects, including migrating legacy SSB systems to the new “Thanos” platform, replacing obsolete server infrastructure.
- Managed server migration for the External Activities System to improve system performance, stability, and scalability.
- Designed and developed an Invoice Schedule Notification SMS system using Node.js.
- Developed a web-based Roaming Rate access system using Angular, enabling Call Center staff to retrieve roaming rate data directly from Excel-based sources.
- Developed RESTful backend APIs using C# to transfer and integrate data from Employee Service systems across multiple web applications.
- Provided system support for AIS Serenade (Serenade Gold) staff welfare projects.
- Supported deployment and maintenance of Retail Shop systems across operational environments.
- Supported data upload and maintenance for the International Roaming Tariff system.
- Completed advanced technical training in SQL Server for Developers, Microsoft Azure development (AZ-204), and Python for web and server-side applications.

April 2015 – September 2021

Programmer Analyst

Extend IT Resource Company Limited (X10) (on site AIS)

- Designed and developed Portal Wi-Fi systems and CMS platforms for public Wi-Fi services using C# for enterprise-scale deployments.
- Developed USSD Web Services for International Roaming Tariff systems using C#.
- Developed internal survey systems (Ethics Survey, Engagement Survey, and Social Survey) to support company-wide employee feedback initiatives.
- Developed batch processing applications using C# (Console Application) for file transfers, automated email notifications, and NAS integration.
- Collaborated with the Line Company (Rabbit LINE Pay team) to develop online survey systems and free SIM registration platforms using C# MVC.
- Collaborated with Adnuntius to redesign the Wi-Fi Portal advertising platform, enabling location-based banner and video advertisements (office, school, supermarket, and airport sites) using Node.js and Angular 8.
- Developed web applications for Steam Shareholder AGM (Annual General Meeting) login systems (2020–2023) using Node.js and Angular 8.
- Developed web applications for AIS Playbox registration by integrating data from the Fixed Broadband Support System (FBSS).
- Debugged and enhanced multiple enterprise web applications, including employee physical therapy registration systems, email filtering and automation systems for call center operations, and Wi-Fi service management systems (myAIS bypass, password request, and password change workflows).

September 2013 – March 2015

Programmer

Control Data Group (CDG) Thailand Company

- Designed and developed a randomized electronic examination (E-Exam) system used at Chulalongkorn university.
- Developed system administration and reporting modules using VB.NET and Crystal Reports to support exam management and academic reporting.

December 2012 – August 2013

SAP MM Functional Consultant

Double A Company

- Configured SAP MM (Materials Management) modules to support procurement and inventory management processes.
- Developed a Tax Refund web system by integrating SAP data to automate tax calculations and electronic submissions to the Customs Department using VB.NET.

June 2012 – November 2012

Programmer

Keeneye Company

- Collaborated in the analysis and development of a Food and Drug Claims Management System for the Coordinating Center, Food and Drug Administration (FDA), Ministry of Public Health, using PHP.
- Developed promotional and advertising web pages for Wacoal Thailand Company and Leneo Company using PHP.
- Developed an internal Content Management System (CMS) to support content management and website updates for KeenEye.
- Completed training in Adobe Flash and Adobe Photoshop for web and digital media development.

2010

Internship and Senior Project collaboration

National Electronics and Computer Technology Center (NECTEC) Thailand

- Developed a web application to analyze and validate the usability of a Voice over Internet Protocol (VoIP) system.
- Integrated and analyzed call data from Trixbox Asterisk to evaluate VoIP performance and reliability.
- Implemented system components using C++ and PHP on a Unix-based operating system.

SPECIAL SKILL

- **Operating Systems:** Windows, Linux
- **Graphics Design:** Adobe Photoshop
- **Compiled Languages:** C++, C# .Net Core , C# .Net Framework , VB.NET
- **Interpreted Languages:** PHP, JavaScript, NodeJS, Google Apps Script
- **Database:** MySQL, SQL Server, MongoDB , Oracle
- **Web Technologies:** CSS, Bootstrap , HTML5 , jQuery, Angular, TypeScript , ReactJS , Vanilla Javascript
- **Server & Deployment:** Git, PM2, Apache, IIS

LANGUAGE

- Thai Native
- English Conversational
- Chinese Basic

Personal Projects & Self-Initiated Work

• **Product Showcase & Ordering Website – Sandwich & Box Set Sales**

(React, TypeScript, HTML, CSS)

- **Designed and developed** a product showcase and ordering website to present sandwich and box set products using ReactJS.
- **Implemented** product catalog display and structured content presentation for customer ordering workflows.
- **Live Demo:** <https://babies-hasu-site.web.app/>

• **Personal Portfolio Website**

(React, TypeScript, HTML, CSS):

- **Designed and built** a professional portfolio website from scratch using **ReactJS** to showcase personal projects and technical skills.
- **Utilized** modern web development practices to ensure a clean, user-friendly, and visually appealing presentation.
- **Live Demo:** <https://nuchkamol.github.io>

• **3D Action/Adventure Game - Self-Initiated Project:**

(Unity & C#)

- **Developed** a functional 3D game featuring core mechanics such as character movement (walking and flying capabilities) and interactive object collection.
- **Implemented** C# scripting for character controllers, game logic, and score management systems.
- **Live Demo:** <https://nuchkamol.github.io/unity>

• **Dormitory Management Website – Family Business**

(HTML, Bootstrap, Vanilla JavaScript)

- **Designed and developed** a web-based system for a family-owned dormitory to manage and present dormitory information.
- **Implemented** responsive layouts and client-side interactions using HTML, Bootstrap, and vanilla JavaScript.
- **Built** for real-world usage to support daily operations of a small family business.
- **Live Demo:** <https://kulanuch-34b98.web.app/>

• **SocialViralAI – YouTube Trend Analysis System with AI-driven insights**

(C#.net, OpenAI)

- **Designed and developed** a full-stack web application to analyze YouTube trends by integrating the YouTube Data API to fetch real-time engagement metrics and metadata.

- **Implemented** a custom ViralScore algorithm to rank content and utilized the OpenAI API to generate AI-driven insights, summaries, and content strategies for users.
- **Built** a responsive UI with a dedicated Shorts-form layout and filtering features, deployed on Azure App Service for scalable, real-world data analysis.
- **Live Demo:** <https://socialviralai.azurewebsites.net/>
