---

## SKILLS

**Programming Languages:** C#, PHP, JavaScript, TypeScript, VB.NET

**Frameworks & Libraries:** .NET Core, .NET Framework, Angular, React, Node.js, jQuery

**Web Technologies:** HTML5, CSS3, Bootstrap

**Databases:** MySQL, SQL Server, MongoDB, Oracle, PostgreSQL

**Tools & DevOps:** Git, PM2, Apache, IIS **Other:** Google Apps Script

---

## EDUCATION

**Master of Science** in Management Information Systems

King Mongkut's University of Technology North Bangkok | 2018-2019

**Bachelor of Science** in Computer Science

King Mongkut's University of Technology North Bangkok | 2008-2011

---

## PROFESSIONAL EXPERIENCE

**Application Development Specialist**

**BEC World (Channel 3)**

**June 2024 - Present**

Accomplishments:

- Designed and developed an end-to-end Public Relations management system based on business and user requirements, streamlining journalist scheduling, event coordination, and communication workflows..
- Participated in meetings with international teams from AP News, supporting API integration and cross-border collaboration.
- Developed real-time APIs to power live TV broadcast displays for election coverage in both the United States and Thailand, collaborating closely with broadcast, graphic, and newsroom teams in a live studio environment to ensure high availability and reliable performance during live production.
- Mentored interns by building a real-time data pipeline using APIs and Google Apps Script to extract data from ServiceDesk Plus into Google Sheets, enabling efficient data analysis and reporting.
- Maintained and enhanced internal systems by troubleshooting issues, improving performance, and ensuring smooth operation of business-critical applications.

**IT Specialist / Programmer Analyst**

**Advance Info Service (AIS)**

**April 2015 - June 2024**

Accomplishments:

- Developed end-to-end web applications integrating Adnuntius in collaboration with network and testing teams, and coordinating with design, QA, and DevOps teams.
- Implemented Rabbit LINE Pay integration to support payment workflows and business operations.
- Troubleshooted and resolved production issues in real time, performing rapid debugging to ensure high system availability and minimize downtime.
- Addressed vulnerabilities and code quality issues identified by static analysis tools, enhancing system security and maintainability.
- Led a large-scale microservices migration initiative as a Project Manager, coordinating with over 200 dependent systems and facilitating cross-team alignment through large stakeholder meetings (40+ participants).

## PROJECTS

**Portfolio website:** [nuchkamol.github.io](https://nuchkamol.github.io) (for additional information and projects)

**SocialViralAI – YouTube Trend Analysis System with AI-driven insights:**

**Github :** <https://github.com/nuchkamol/SocialViralAI> **Live Demo :** <https://socialviralai.azurewebsites.net/>

“Analyze trending YouTube videos and identify high-performing content using AI-driven insights and custom scoring”

- Designed and developed a full-stack web application to analyze YouTube video trends and performance.
- Integrated YouTube Data API to fetch video data including views, likes, and metadata for analysis.
- Implemented a custom ViralScore algorithm to rank videos based on engagement metrics.
- Built AI-powered insight generation using OpenAI API to summarize trends and recommend content strategies.
- Developed backend services using ASP.NET Core and REST APIs for data processing and integration.
- Created responsive UI with video grid and Short-form video layout to enhance user experience.
- Implemented filtering features (keyword search, trending videos, Shorts detection) to improve content discovery.
- Focused on scalable and maintainable architecture for real-world data analysis use cases.
